ABOUT US

In today's fast paced business environment, businesses need to react to opportunities & threats faster than ever before, whilst remaining true to its core purpose & not lose its corporate identity. For that reason, businesses no longer require someone who will just be an accountant. Rather, businesses are more inclined to sought-after partners that can be relied upon to offer you a range of innovative solutions to your sector specific financial reporting, tax and compliance needs whilst providing financial insights on areas where business financial value is most created & most destroyed.

Ukuphila Kwezwe Accountants provides holistic tax, accounting & advisory solutions to small, micro, medium enterprises & non-profit organization across South Africa. Our firm is accredited by South Africa's largest accounting profession regulating body - The South African Institute of Professional Accountants (SAIPA). Our management are also registered tax practitioners with the SARS & registered labour practitioners with the Department of labour thus competent to your needs. Best part is that we leverage on our ability to turn numbers into meaningful tools to provide a clear X-Ray of the organisation's financial health & well-being.

FEE STRUCTURE

We understand that a major consideration for your organization is value for money; we are thus committed to providing exceptional service at fixed monthly fee you can incorporate into your monthly budget. We do offer once of assignments on an ad-hoc basis. All prospective clients are first provided with a detailed quote, transparently breaking down each element that contributed to final professional fee.

Our transparent pricing puts you in control, knowing that you won't be hit with nasty surprises the next time the invoice hits your desk. Best of all we quantitatively & qualitatively quantify how we drive back value to your business, providing you with a picture on how our forward thinking 'clinic like' accounting and advisory services helps your organization to improve its overall financial 'health' status.

We don't bill per hour, we don't have hidden costs, just one simple fixed monthly fee that is predetermined based on the actual accounting services you will consume spread across the year. We do this as we are a business ourselves & like our clients, we hate nasty surprises ourselves when the invoice lands in our desk.
